

WIRI OIL SERVICES LTD

Marsden Point Terminal Major Hazard Facility

Major Hazard Facility Major Accident Prevention Policy

Wiri Oil Services Limited (WOSL) operates the Marsden Point Terminal, which has been designated as a lower tier Major Hazard Facility under the Health and Safety at Work (Major Hazard Facilities) Regulations 2016. As required by the MHF Regulations, WOSL has developed a Major Accident Prevention Policy (MAPP) that demonstrates that all potential major incidents (e.g. fires, explosions) have

been identified and WOSL has the ability, means and adequate controls in place to minimise the risks of these incidents so far as is reasonably practicable.

The MAPP provides assurance to workers, emergency services, the community and others that the potential for major incidents has been systematically assessed and that effective and suitable controls are in place.

The Marsden Point Terminal is an onshore liquid transport fuel storage facility located on Mair Road, Marsden Point. The terminal receives fuel (gasoline and diesel) from the adjacent Refining New Zealand (RNZ) operated Marsden Point Oil Refinery.

The six terminal bulk storage tanks act as a buffer between the supply from the refinery and the outflow into road tanker wagons, which distribute product to retail outlets and other consumers.

**‘Health, Safety and Environment:
it’s how we do business’**

WOSL is committed to major incident prevention and management as a primary company objective and providing, so far as is reasonably practicable, a working environment that is safe for its workers and everyone associated with our business.

What to do in the event of a major incident

The identified major incidents from the Marsden Point Terminal that have a potential offsite consequence affecting the local community are events that cause a loss of containment of gasoline from storage tanks or process equipment that, if ignited, could result in a fire or explosion.

Potential major incidents at the Marsden Point Terminal are **highly unlikely** to have a direct impact beyond the site boundary and affect the public

- ⊕ A site siren, which is audible offsite, is sounded to alert on-site personnel only and does not require any immediate community action.
- ⊕ If there is a possibility of the public being affected in the event of a major incident related fire or explosion at the Marsden Point Terminal, WOSL will send an eText to each of its neighbours and surrounding facilities to inform them. Fire and Emergency New Zealand will assume control of any major incident emergency on arrival at the terminal in collaboration with WOSL, local authorities and other emergency service organisations (e.g. New Zealand Police, Civil Defence).
- ⊕ The local community will be updated during a major incident emergency as required and WOSL asks that you follow any emergency action instructions provided via eText or communication with local authorities or emergency service organisations until you are informed of termination of the emergency.
- ⊕ Following a major incident emergency, the local community, neighbours and surrounding facilities will be provided with information about the major incident and actions being taken via eText.

General Advice

1. Remain indoors, close windows and doors
2. Search social media and local radio for information
3. Do not call the terminal
4. Stay away from the terminal
5. Adhere to road closures/diversions
6. Self-evacuate out of the area if you feel more comfortable
7. Seek medical attention if you feel impacted

Further Information

The information provided in this pamphlet will be reviewed and revised as required if a change is made to the Marsden Point Terminal MAPP and the major incident risks at the terminal.
